PT**EH****WP****NM**

Additional Specifications

In addition to the safety toe feature, the Ariat Workhog H2O Composite Toe Waterproof Western Wellington has Waterproof Pro™ construction with a full-grain leather upper and Goodyear® welt construction.

Comfort comes in a mesh lining and shock-absorbing EVA midsole.

The outsole is practical and easy with a self-cleaning, non-tracking tread design made of oil- and slip-resistant Duratread™. Confidence comes in an extra-wide shank that provides maximum side-to-side stability in harsh outdoor work environments.

The design on the 11" upper gives this boot a definite traditional western look. With a 90 degree heel and a roper toe, this boot is both comfortable and durable. It meets ASTM F2413 I/75 C/75 protective toe classification and electrical hazard standards. When looking for a boot that is durable, safe and comfortable, look no further than the Ariat Workhog.
